Worldcall Telecom Limited

DIRECTOR'S REVIEW

The directors of Worldcall Telecom Limited have the pleasure to present to the shareholders 1st quarterly accounts for the period ended 30 September 2005.

Review of Current Operations

The company has successfully launched its WLL services in eight cities of Punjab, whereas further roll out in nine cities is in the pipeline which includes expanding beyond the Punjab horizon as well. Slight delay in the roll out is due to obvious mobility reasons in view of current country situation in post earthquake scenario. The company has earned total revenue of PKR 593 million from both of its operations i.e. WLL and LDI services. There is a noticeable increase in customer base at the end of the first quarter. WTL has already entered into agreement with two companies with regards to white labeling of payphones and started its services with one of these.

The company has made a total profit of PKR 17.4 million for the current quarter. This has been achieved by utilizing the team effort of best professionals brought together by the management. The management is also working for the optimum utilization of the available resources to achieve cost reduction. This is evident by comparing the results of the annual accounts with this quarter: the gross profit margin has increased to 17.6% as compared to 10.3% at the year end. The operational cost has been decreased by 1% of gross revenue as compared to the results of the year ended on June 30, 2005.

Future Outlook

The management of the company is keen to make the company a leading trend setter in WLL and LDI services by continuously providing value added service to the customers. The company has launched its internet services in the mid of this quarter under review. The management is also keen to get the leading position in the market by capturing the untapped market and will try to reach those areas and enjoy the benefits of the first movers. The management has set its foot for the upcoming phase II of WLL project.

With the passage of time and increase in competition in the telecom market, the directors are keenly observing the changing circumstances. The strategy is two pronged; adopting a dynamic pricing regime to ensure most competitive tariffs in the market, plus, focusing on providing best customer services to strengthen our bond with the subscribers. Best tariffs and improved customer care will ensure a wider subscriber base and, hence, a growth in revenues in future.

Worldcall Group is working on consolidation of all its telecom and broad band businesses in the interest of shareholders and other stake holders. The vision is to be a full telecom, including broad band, services provider under one entity. Necessary approval for consolidation of different entities under one umbrella shall be placed before the shareholders for approval in due course as and when required.

Both the requests with PTA regarding deferment of license fee and determination of limited mobility are yet to be decided by PTA.

Acknowledgement

The Directors acknowledge the hard work and valuable services of its employees and continue to believe in the mutual sharing of rewards resulting from the dedication of all employees.

For and on behalf of the Board of Directors

The Company continues to have a policy whereby all transactions with related parties are entered into arm's length generally determined in accordance with "Comparable uncontrolled Price Method".

6. Contingencies and commitments

- 6.1 PTCL has billed 2.5 million excess minutes as compared to the Company's record due to which there is difference of Rs 17.6 million with PTCL on account of interconnect and settlement charges, which has not been provided for in these financial statements.
- 6.2 There is a difference of Rs 112 million between the amount billed by PTCL upto May 2005 and the amount charged by the Company on account of Domestic Private Lease Circuit (DPLC) charges. The difference is mainly due to following.
- 6.2.1 PTCL has billed the DPLC charges on the basis of rates defined in the Interim Reference Interconnect Offer (RIO) issued on 28 July 2004 ignoring the downward revision in rates through the revised RIO issued by PTA on 6 May 2005 with retrospective effect. Due to this the impact of Rs 40 million remains unprovided in these financial statements. The management is contesting the issue and expects that the matter will be settled in the Company's favour.
- 6.2.2 There is a difference of Rs 40 million due to the difference in formulae used by PTCL and the Company for the calculation of DPLC charges. PTCL has charged bandwidth on the basis of activation of DPLC link whereas the Company has calculated the bandwidth charges from the date of activation of Digital Interface Units (DIU) for commercial operation and in proportion to activation of DIUs related to each DPLC.
- 6.2.3 PTCL has charged the company Rs 32 million for the link between Karachi to Islamabad which has not yet been activated.

Worldcall Telecom Limited

- 6.3 Letter of guarantees outstanding as at 30 September 2005 amounting to Rs 119.387 million (June 2005: Rs 51.370 million) are issued in favour of PTCL.
- 6.4 Commitments for capital expenditure amounting to Rs 382 million (June 2005: Rs 236.6 million).

7. General

- 7.1 Figures in the financial statements are rounded off to the nearest rupee.
- 7.2 Profit and loss account does not carry comparatives as the Company started commercial operations of LDI & WLL on 01 December 2004 and on 08 June 2005 respectively.
- 7.3 Previous period's figures have been rearranged and reclassified wherever necessary for the purpose of comparison. Major changes made during the period were reclassifications resulting from the submitted fourth schedule to the companies Ordinance, 1984.
